

## **Anyone's Daughter LAST TRACKS (Remaster) CD**

**Released: 28th of September 2018 - SPV 80612 CD - TF VÖ 43**

**Limited Edition of 1000 CDs!**

**The long lost 1986 Album by Anyone's Daughter for the first time on CD! This album features Demos from 1978 and 1985 of two different Band line-ups.**

The first four songs (1978) are very much in the vein of 70s progressive and can be compared to their famous ADONIS album of 1979. Three of these four tracks have not been released on any other album. Prog-Rock fans will love those recordings with many keyboards, organ and its complex structures.

Track number five is a solo song by keyboardist Matthias Ulmer.

The four last songs on LAST TRACKS are played by a unique Anyone's Daughter line-up that did some touring in 1985 and 1986. They worked on these songs as demos, but a regular record release was rejected. So these songs are the only musical document of that mid 80s line-up. That are very interesting recordings too, because they got a special 80s feeling together with some 'Peter Gabriel'- vibes.
